

# Kick-off Meeting JPND124N070, Istanbul

## *Delineating the role of HTT Cis-Variants in the pathogenesis of Huntington disease*

Huu Phuc Nguyen, MD

Abteilung für Humangenetik  
Ruhr-Universität Bochum, GER

Jiří Klempíř, MD, PhD

Dept. of Neurology and Center of  
Clinical Neuroscience,  
Charles University in Prague, CZE

A. Nazlı Başak, PhD

School of Medicine, KUTTAM  
Suna and Inan Kırac Foundation,  
Director of Neurodegeneration  
Research Laboratory  
Koç University, Istanbul, TUR

Åsa Petersén, MD, PhD

Professor in Neuroscience,  
Senior Consultant in Psychiatry  
Lund University, SWE

Mahmoud A Pouladi, MSc, PhD

Associate Professor, Department of Medical  
Genetics Investigator, BC Children's  
Research Institute Scientist, Centre for  
Molecular Medicine and Therapeutics,  
Michael Smith Health Research BC Scholar  
The University of British Columbia, CAN
